1. Applicant's election of the species of Fig. 18, claims 39-49 without traverse is acknowledged. Thus, Claims 1-18 and 50-62 are withdrawn from further reconsideration on the merits as non-elected claims. However, after carefully reviewing the claims, the examiner notes that there is a restriction requirement for the claims.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 39-46, drawn to an image sensing apparatus, classified in class 348, subclass 222.1.
- II. Claims 47-49, drawn to an image synthesis apparatus, classified in class 348, subclass 239.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the image synthesis apparatus of Group II can be

implement in any electronic camera; where the synthesis apparatus can be operated without any assistance from the circuits of claims in Group I. The subcombination has separate utility such as an image synthesis circuit for a video camera.
